

EpiPen® Auto-Injector supply update March 2019

Mylan takes the supply of EpiPen and EpiPen Jr Auto-Injectors very seriously, and we appreciate the importance of patients with life-threatening allergies to have access to epinephrine auto-injector products.

Mylan has worked closely with Meridian Medical Technologies, the manufacturer, to alleviate the intermittent supply constraints last year and we are pleased to provide the latest supply update.

There is sufficient supply of EpiPen® Adrenaline (epinephrine) Auto-Injector at wholesalers and at Mylan's warehouse to meet current patient needs in Australia.

Stock at both wholesalers and at Mylan's warehouse is adequate, and orders from wholesalers and pharmacies are being filled as they are received.

As a prudent measure to provide an extra safeguard for this critical medicine, Mylan Australia is carefully managing stock levels, including by reviewing orders as they are received.

Mylan Australia's dedicated, toll-free EpiPen Customer Service hotline 1800 931 625 remains up and running for any enquiries.

Further, we have and will continue proactively and diligently to communicate with pharmacies, healthcare professionals, patient advocacy groups and health authorities regarding the supply situation.
